The Energy Performance

Home-Kim / HK Windows' energy performance window is different. It's more than just a technologically advanced window. It's a commitment to deliver lasting beauty and protection to your home.

Frame and sash have multiple hollows for strength and energy efficiency.

HK Windows manufactures our strong and energy efficiency windows using CHELSEA BUILDING PRODUCTS, a proven performer family of products designed and engineered using computer-aided design (CAD) and sophisticated 3-D modeling technology. TrustGard windows feature a 3-1/4" mainframe in both replacement and new construction products. The attractive beveled frame and slope sill design provides a classic window appearance. Universal accessory grooves are consistent around perimeter.

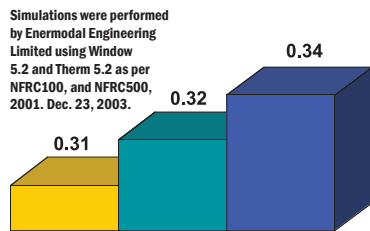

Built with "Guardian ClimaGuard 71/38 Low E", all windows manufactured by **HK Windows** help keep indoor temperatures comfortable regardless of the outside elements. Cost savings on utility bills make this option the choice of homeowners across the country.

Maintaining a comfortable indoor environment is a challenge when temperatures fluctuate, sometimes dramatically, throughout the day, between seasons, and across climate zones. According to U.S. Government estimates, an average household spends more than 40% of its annual energy budget on heating and cooling. The Low-E Glass / Argon Gas and warm edge spacer glass package insulates and protects the home from harmful UV rays.

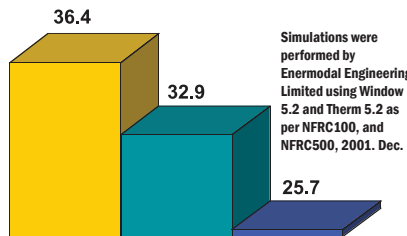

The use of Duralite® spacer gives the windows manufactured by **HK Windows** the advantage of improved condensation resistance, less conductivity, a continuous moisture vapor barrier and low moisture vapor transmission rate.

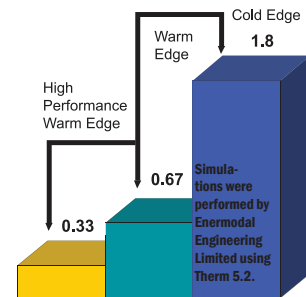

Total Window U-value
Duralite can improve the total window U-value.

■ Duralite ■ Intercept ■ Aluminum SB

Edge of Glass Temperature
Better insulating Duralite improves the temperature of the glass. Warmer glass makes you feel more comfortable.

Conductivity
The lower the conductivity the better the spacer insulates the window. Better insulation saves more energy.

All windows manufactured by **HK Windows** are tested using NFRC and Energy Star™ standards offering the best in energy performance. Some restrictions may apply.

Casement/Awning TG755 / 795

(New Construction) (Replacement)

A top-of-the-line casement window that offers the best in aesthetics, efficiency and durability. Many prefer this unique window for the unobstructed views and ease of operation. Jamb hinges allow the window to completely open for maximum ventilation & structural integrity to guard against air & water infiltration. Ideal for use above sinks or counter tops.

GENERAL

Series / Types: Casement / Awning
 Test Size: As Tested 24 x 48" AAMA Gateway
 Min Size: Width 16" x Height 24"
 Max Size: Width 32" x Height 72"

REGULATORY

Structural Rating: DP50 available, In accordance with AAMA 101-97
 Forced Entry: Grade 10, In accordance with AAMA 101-97
 NFRC/Energy Star: Rating simulations available for various glass packages

FRAME

Frame Depth: Strong, durable 3 1/4" wide frame
 Frame Color: Cream White
 Frame Style: Exterior Bevel
 Sill Type: Slope sill, No weep
 Receptor Groove: Universal, Face mount

SASH / LITE

Sash Removal: Take-out (Screw driver required)
 Truth Maximum Hardware: Operator System, Hinge system & Multi-Point and Single Point Locking System
 Glazing System: Interior glazed bead, Tape or Unit Glazed
 Reinforcement: None

IG

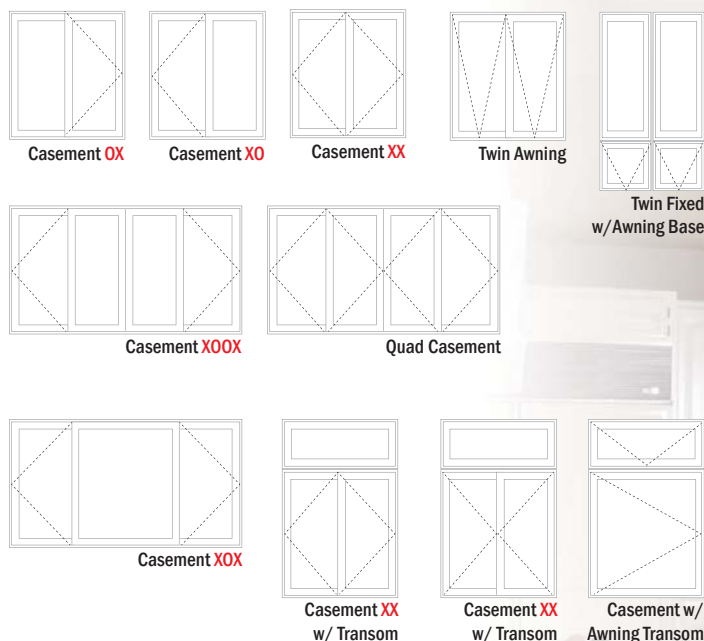

Thickness: 7/8"
 Glass Type: Regular clear, Low-E, Tempered, Obscure

OTHER

Screen: Full screen
 Argon Gas: Available
 Weatherstripping:
 Dual weatherstripping at the meeting rails
 Dual weatherstripping around perimeter of sash

WARRANTY

Limited Lifetime Warranty

Shape & Fixed TrustGard

HK windows offers a virtually limitless variety of standard and custom shapes and fixed windows. Fixed windows and shapes can be used by themselves to provide beautiful views, design accents, or add extra style to a window grouping. Fixed windows do not open. Let us help customize your home.
